NRx Pharmaceuticals to Report Second Quarter 2023 Financial Results on August 14, 2023

RADNOR, Pa., Aug. 7, 2023 /PRNewswire/ -- NRx Pharmaceuticals, Inc. (Nasdaq: NRXP) ("NRx Pharmaceuticals", the "Company"), a late-stage biopharmaceutical company, today announced that it will release its second quarter 2023 financial results after the market closes on Monday, August 14, 2023, via press release, which will be available on the Company's website at <https://ir.nrxpharma.com/>. The Company will host a conference call to discuss the financial results as well as provide a corporate update at 4:30 p.m. ET the same day.

The quarterly results and the conference call are anticipated to include updates on recent progress related to development of NRX-101 in the treatment of bipolar depression, chronic pain, and other indications.

A live webcast of the conference call will be available on the Company's website at <https://ir.nrxpharma.com/news-events/ir-calendar>. Participants that are unable to join the webcast can access the conference call via telephone by dialing domestically +1 (833) 630-1956 or internationally +1 (412) 317-1837.

About NRx Pharmaceuticals

NRx Pharmaceuticals is a clinical-stage biopharmaceutical company developing therapeutics for the treatment of central nervous system disorders, specifically bipolar depression with suicidality, chronic pain and post-traumatic stress disorder (PTSD). The company's lead program NRX-101, an oral, fixed-dose combination of D-cycloserine and lurasidone, targets the brain's N-methyl-D-aspartate (NMDA) receptor and is being investigated in a Phase 2b/3 clinical trial for suicidal treatment-resistant bipolar depression, which includes patients with both acute and sub-acute suicidality, an indication for which the only approved treatment is electroshock therapy. The company's prior Phase 2 STABIL-B clinical trial evaluating NRX-101 in patients with Severe Bipolar Depression with Acute Suicidal Ideation & Behavior (ASIB) demonstrated a substantial improvement over available therapy in reducing depression and suicidality compared to placebo when patients were treated with NRX-101 after a single dose of ketamine. Based on the findings from the STABIL-B trial, the U.S. Food and Drug Administration (FDA) granted a Special Protocol Agreement and Breakthrough Therapy Designation for NRX-101 in patients with Severe Bipolar Depression with ASIB.
