The Company is developing NRX-101, an FDA-designated investigational Breakthrough Therapy, for suicidal treatment-resistant bipolar depression and chronic pain. NRx recently filed an Abbreviated New Drug Application (ANDA) for NRX-100 (preservative free IV ketamine) for use in ketamine's currently approved indications. Additionally, the Company has initiated a New Drug Application filing for NRX-100 for the

treatment of suicidal depression, based on results of well-controlled clinical trials conducted under the auspices of the US National Institutes of Health and newly obtained data from French health authorities, licensed under a data sharing agreement. NRx was awarded Fast Track Designation for development of ketamine (NRX-100) by the US FDA as part of a protocol to treat patients with acute suicidality and has filed a patent for this novel formulation with the US Patent and Trademark Office.
